

NUMSS coin (NMS) :

NUMSS coin is belongs to the physiomed company

This coin is for investment in designing and manufacturing home physiotherapy devices.

Piso Quinn's new project is an investment to turn every person's mobile phone into a home physiotherapy device.

This project is in the experimental production stage.

In addition to helping patients and providing them with easy treatment, investors will benefit greatly.

Applications in the specialities

We will show you with which products and services in physical therapy and biomechanics you can get your team ready for the Champions League in treatment quality.

-
- Aesthetic medicine
 - Dermatology
 - Gynaecology
 - Lymphology
 - Neurology
 - Obstetrics
 - Oncology

- Orthopaedics
- Phlebology
- Phoniatry
- Rehabilitation
- Rheumatology
- Sports medicine and performance diagnostics
- Surgery
- Traumatology
- Urology

• Physical therapy solutions

Experience high-quality classic products and discover innovative therapeutic concepts. Our technical approaches are rapidly advancing rehabilitative medicine.

Applications in the specialities

We will show you with which products and services in physical therapy and biomechanics you can get your team ready for the Champions League in treatment quality.

Biomechanical testing, training and therapy systems

Our biomechanical test, training and therapy systems meet the highest demands in user safety, precision and reproducibility in diagnostics and allow for differentiated therapy through innovative features

NUMSS UNIVERSITY complete solutions

We offer analysis, design and implementation from a single source for facilities in the fields of sports, aesthetic medicine, rehabilitation and healthcare.

No matter whether you want to expand or modernise your existing rooms, we offer professional and independent consulting worldwide – from feasibility analyses to turnkey solutions.

Financing

- keeping abreast of the state of the art
- targeted investments
- tailor-made financing

In order to always remain up-to-date in terms of technology, alternative and innovative financing options are increasingly important for many providers in the healthcare field. We offer tailor-made financing solutions for our customers and individually adapt these solutions to match your requirements.

Design

- demand-oriented planning
- optimal workflow
- focus on technical feasibility

Are you starting from scratch or based on existing building plans? We develop a technical planning including design proposals to meet your needs. To this end, we create visualisations of the project in advance and develop detailed constructional drawings for definitive implementation for you over the further course.

Construction

- keeping architectural aspects in mind
- feasibility analysis
- seamless integration of complex medical devices

We scrutinise your project idea, structure it and assess it for feasibility. We recommend you medical devices that exceed your individual requirements, and always make plans with a view to the architectural conditions. Whenever interior equipment needs to be changed, you can rely on our concepts. In particular in the case of existing projects, we have many years of experience in evaluating the architectural conditions from logistical and technical perspectives and taking account of the special requirements for complex medical devices.

Resource planning

- analysis of requirements
- optimising the patient flow
- compliance with relevant standards

As far as your equipment is concerned, we do not accept compromises and rely exclusively on leading manufacturers and efficient products of the highest quality. On the basis of a careful analysis, we create a requirements planning for you and optimise the patient flow together with you. Next, we determine the relevant equipment and staffing needs, taking into account all applicable standards.

Configuration

- [configure individually](#)
- [integrate into your workflow](#)
- [meet specific requirements](#)

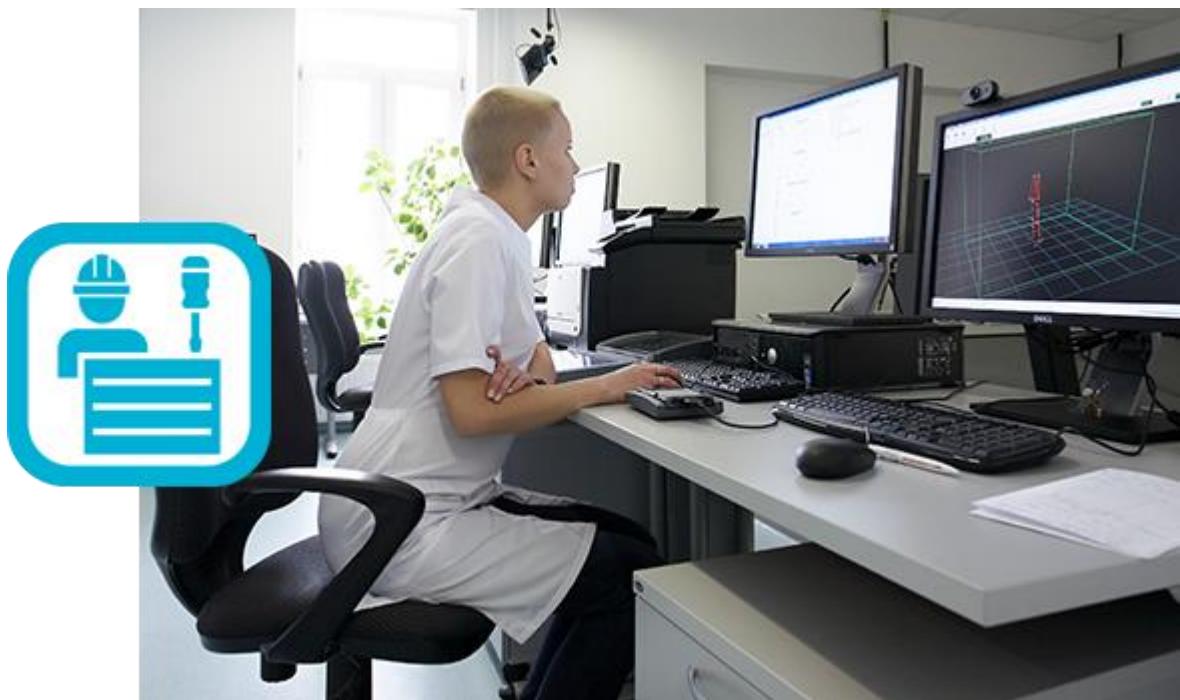

When modernising an equipment pool or integrating new systems, it is always crucial that all individual components interoperate well. By means of appropriate configuration, we ensure that our systems integrate well into the workflows in your company and suit your requirements perfectly.

Installation

- proper installation
- integration of special solutions
- compliance with local regulations

Medical devices require proper installation and commissioning on site. Additional calibrations, safety checks or special solutions may be required. We consider it a matter of course that high-quality products are handed over with utmost diligence, too. We ensure this in cooperation with the manufacturers and with reliable partners of many years' standing – taking into account the local regulations, of course.

Training

- user training
- maintaining the value of the equipment in the long term
- regular refreshment of knowledge

User training is an important prerequisite for being able to use medical devices safely and over their full range of applications. As medical devices need to be controlled and serviced regularly, training of the technical staff is likewise important to ensure maintenance of the equipment in the long term. For these areas, we offer our customers retraining or refresher training courses at regular intervals.

Warranty services

- long-term maintenance contracts
- reliable partners
- fast solutions

In order to allow systems to be scheduled safely and efficiently at any time, fast solutions are required when it comes to warranty handling. We will be pleased to agree extended warranty periods or conclude long-term maintenance contracts with your centre. Here we cooperate closely with our partners and manufacturers who have proven their reliability over many years.

After-Sales-Service

- perfectly organised facilities
- efficient patient care
- long-term partnership

We believe that good service does not end with the delivery of our systems, but the delivery is the beginning of a partnership with a shared goal: We want to build perfectly organised and functioning healthcare facilities together with our customers, in which patients are taken care of efficiently, safely and with state-of-the-art technology.

NUMSS is the leading manufacturer of the aesthetics and physical Machine Main Supply EMSCULPT,5D HIFU, Tecar RF, Shockwave, Velashape, ect machine which uses for face lifting, body Slimming, body pain relief.

we have excellent teams (clinical trial beautician team; creative and Mature designer and engineer team, Professional and patient Sales team ;) who focus on product development &

design, quality control; offer high satisfaction service to the customer, therefore we have a good reputation among our customers.

According to the market research and demands, we design the novel and unique outlook for the machine and develop the newest technology.

Our machine offers the CE, ROHS certification, and our machine has outlook design patent.

We will be training the salesman of all the details and operation of the new arrival machine, in order to let the sales introduce the machine to the customer better and answer the question of the machine from the client.

NUMSS coin purpose: Increase value with quality; create value for customers.

Choose NUMSS coin is your best choice, Any need for the beauty machine, Contact us without hesitate

Be a quality EM Sculpting Machine supplier, we provide HIFU Facial Machine, Tecar Therapy Machine, Microneedle RF Machine, Shockwave Therapy Machine, etc.

NUMSS coin is a very valuable coin that its holders will soon be proud to own.

THE BENEFITS OF WALKING

BRAIN

Improves mood

BACK

Relives back pain

HIPS

Reduces Hip fracture

LEGS

Lowers the risk of blood clot

FEET

Reduces the load on other joints

EYES

Wards off Glaucoma

HEART

Lowers blood pressure and risk of heart attack

ARM

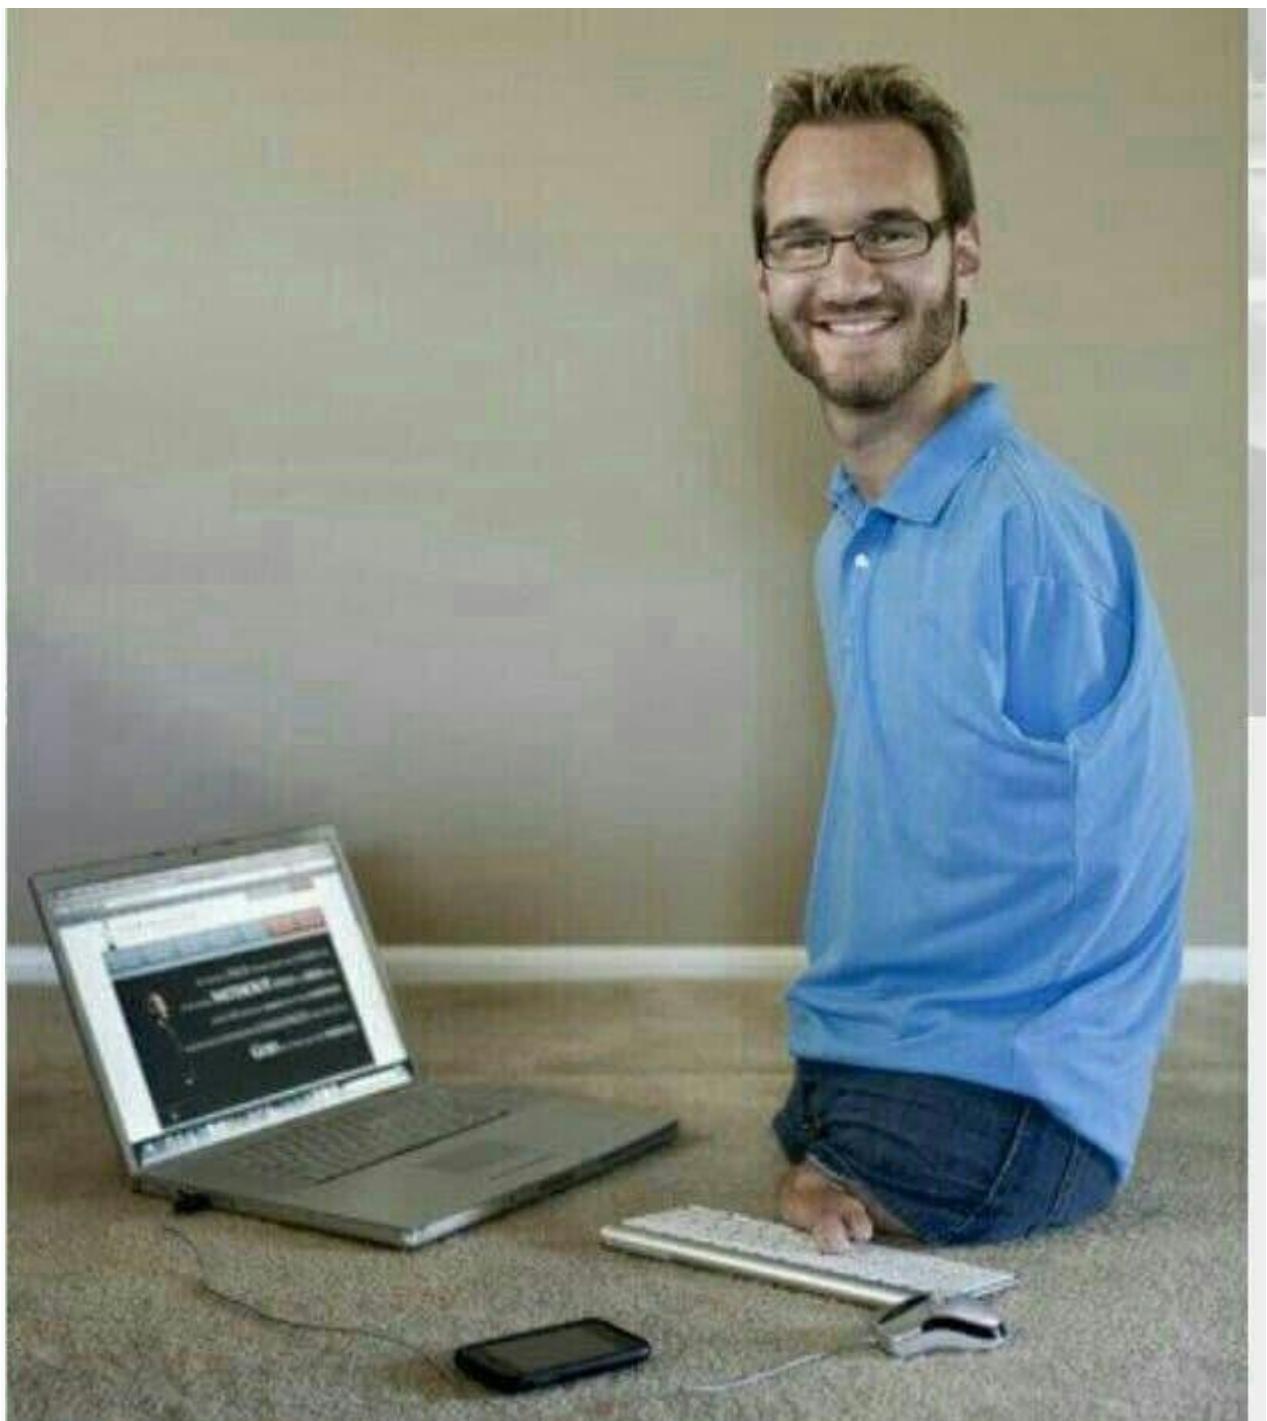

Strengthens arm muscles

KNEES

Keeps joints lubricated

People were created to
be loved. Things were
created to be used. The
reason why the world is
in chaos is because
things are being
loved and people
are being used.

CERTIFIED AQUATIC MUSCULOSKELETAL WORKSHOP

28th – 29th April, 2018 (9 am – 5 pm) IN Andheri, MUMBAI

WHAT DOES IT COVER?

Properties of water | Effects of water on body | Usage of various Aqua fitness equipment.
Aquatic musculoskeletal assessment | Aquatic therapy basics |
Aquatic stretches | Aquatic Exercises for Musculoskeletal disorders UL, SPINE, LL
Safety measures | Acclimatization with water | Develop Clinical rationalization for application |
Detailed explanation of each Aquatic tool with reasoning.
4 hours' practical and 4 hours' theory on each day.

WHO CAN REGISTER?

Physiotherapists professionals, students & interns. Knowing swimming is not essential.

KEY FEATURES.

- ✓ Interactive, demonstration skills with main focus on practical.
- ✓ Basics of each topic covered with detailed explanation and visual feedback.
- ✓ Making you confident in taking Aquatic therapy for musculoskeletal conditions.
- ✓ Case studies and its implementation.
- ✓ Biomechanics behind each topic covered in workshop.
- ✓ Clinical reasoning and decision making towards client's aquatic therapy.
- ✓ Teaching skills which will expertise you professionally.

Resource Person: Prachi Shah Arora

Sports Physiotherapist for Indian Swimming & Diving team
Certified Aquatic, Manual, and Kinesio taping Therapist | Master trainer (YOS certified)

Call / Whatsapp – 9920146757

Email: ipt4u@gmail.com

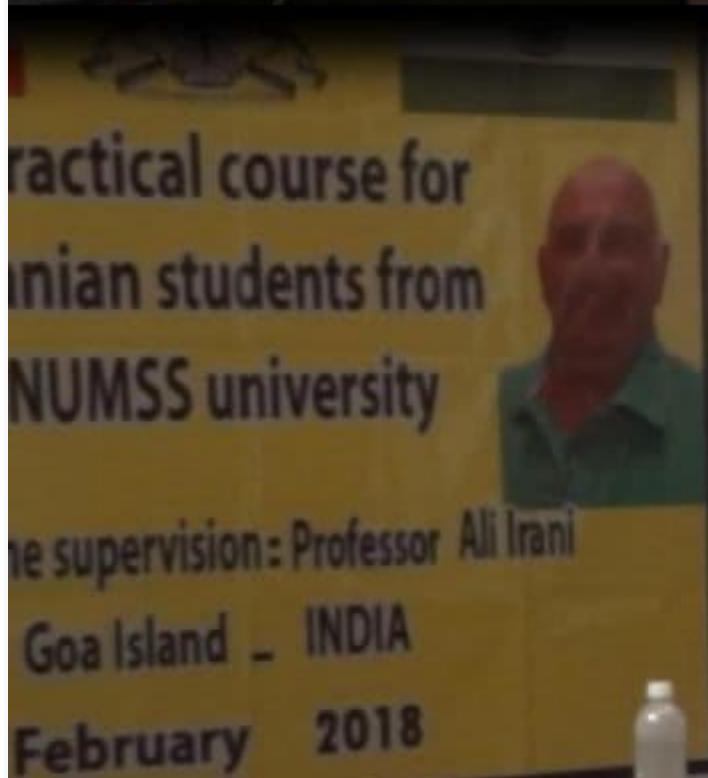

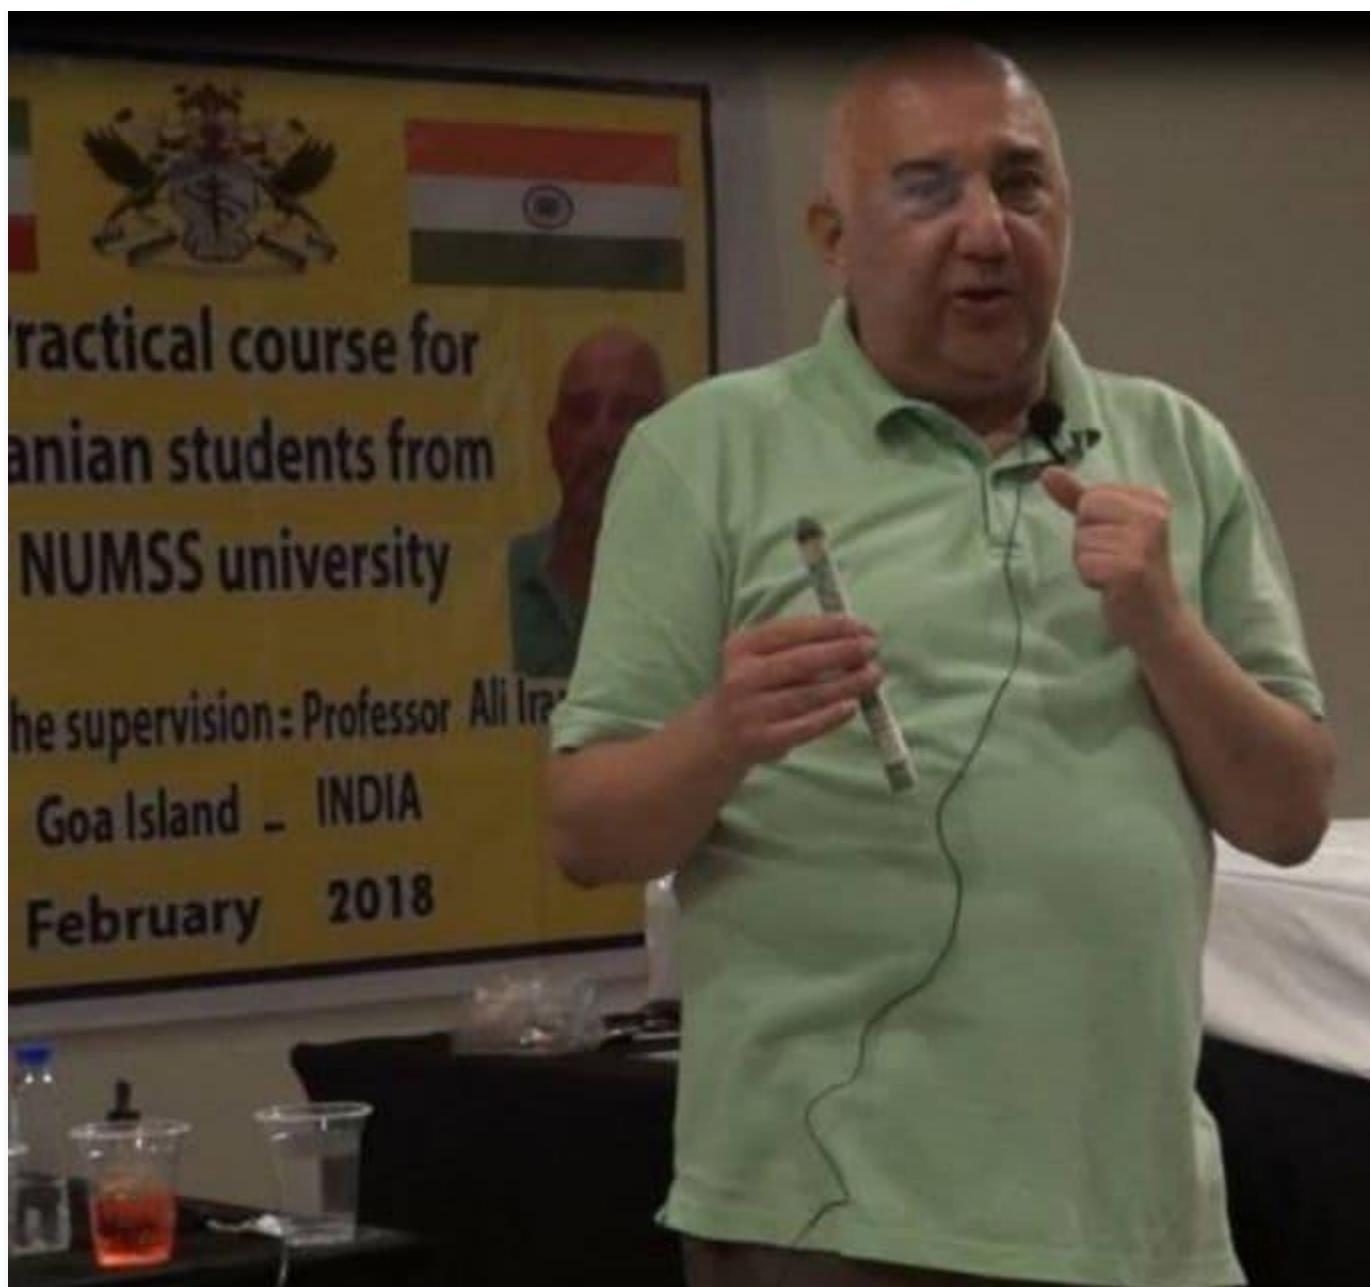

Early bird registration: 7200/-

After 5th April: 7800/-

Spot registration: 8100/-

Workshop kit will include videos, Aqua noodle, reading and writing material.
